

I agree with the petition designated as RM-10868 to have a novices class license with 5wpm morse code and with a 2 year time to upgrade or take the novices test again. The Technician should be with the General class and keep the code at 5wpm. The current advanced should be grandfathered into the Extra class. Any new Extra class would have to take the code at 5wpm and the written test. The amateur radio question should be kept as is. There should be no Vanity call signs for 2 years for any class.
